

# PIVOTA® DX 58 3D Cutout Drawing

## cutout ratio

Frame (X)	Leaf (Y)	Distance (Z)	Radius (R)
<u>3 mm</u>	<u>3 mm</u>	<u>0 mm</u>	<u>1 mm</u>
4 mm	3 mm	1 mm	3 mm

Please note that the cutout ratios become more unfavourable downward in the table with the effect of reducing the adjustability of the hinge.  
Ideal case: door recess 3 mm, frame recess also 3 mm (underlined).  
A big radius at the door and frame is recommendable.
